## Women Graduates.

The result of the examination for women, held last June by the University of Cambridge, has just been announced. The number of candidates continues to exhibit a steady increase, being 154, as compared with 127 last year. The proportion of failures in group A (the indispensable part of the examination, including English history and literature and arithmetic), has decreased, the number of successful candidates being forty-four, while last year it was thirty-seven, and the quantity of work in this department appears to have improved, as the first class has increased from ten to sixteen. On the other hand, in group B (foreign language) there appears a slight falling off, the number in the first class being only six. Group C (mathematics) is "conspicuous by its absence;" it is hoped that the exhibition offered next year for success in these subjects may attract some attention to them. There is also a slight diminution in the numbers of group D (logic and political economy), but the quality of work here seems to have been very good, as no fewer than four out of eight obtain marks of distinction for political economy.

Captain Anderson and his party of engineers, who are to act with the American engineers in running the boundary line between Canada and the United States from the Lake of the Woods to the Rocky mountains, have left Pemmiana to enter upon their work.

The Sultan of Turkey has banished Mahomed Pasha for appropriating public money to his own use.
